Tapetech[®] Automatic Taper
Tapes all joints - internal, flat, walls or ceilings
Work Smarter – Not Harder

**Spare
Parts and
Service
Available**

Applies paper tape and the correct amount of joint compound simultaneously, regardless of the tool users speed

Easy access to cutting blade. Blade cuts in both directions

Lightweight - tool only weighs 2.6kg

Manufactured from lightweight gold anodised aluminium and stainless steel

Filler - fills from conventional pumps with gooseneck attachment

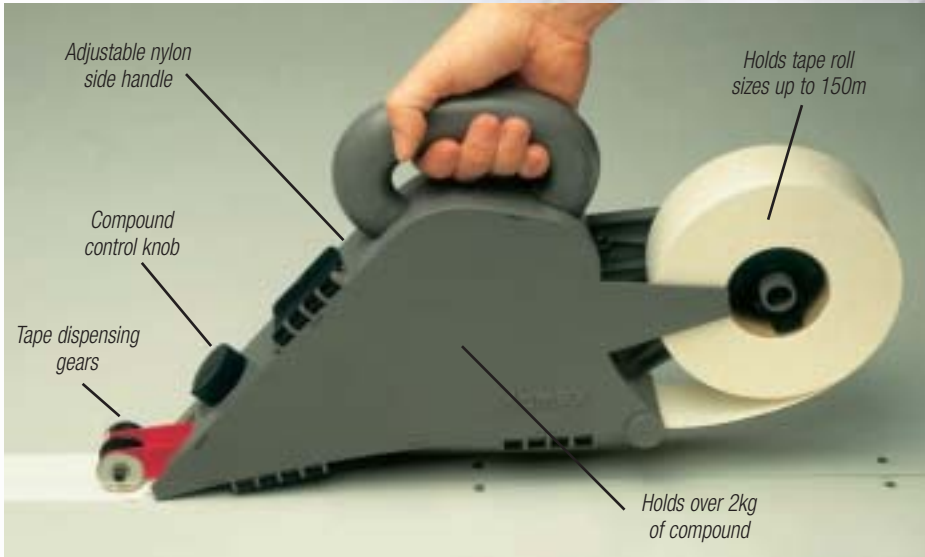

Corner creasing wheel for easy bedding of tape in internal corners

Easy to use control tube for advancing and cutting of paper tape

Large capacity compound chamber

Quick change tape holder - holds 75m or 150m rolls

PRODUCT CODE	DESCRIPTION	PRICE EACH	CARTON QTY	CARTON PRICE EA.
AUTOMATIC TAPER				
	Applies paper tapes and joint compound simultaneously to any joint; walls, corners & ceilings. It automatically dispenses the correct amount of joint compound under the tape regardless of the tool users speed. It is loaded with compound using the loading pump and gooseneck adaptor.			
TX700	Tape Tech Automatic Taper	3099.00	2	POA
	Taper extension attaches easily to most brands of automatic tapers adding an extra 610mm to their length. This allows easier access to high areas.			
TPAE1	Tape Tech Taper Extension	599.00	2	POA

The taping tool everyone can afford

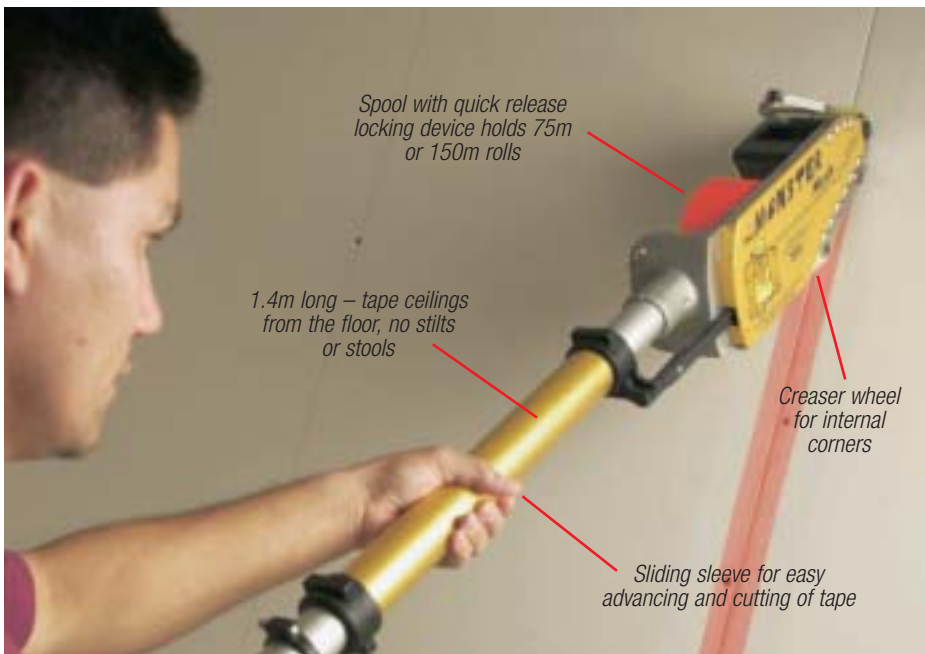

Applies base compound and tape in just one step.

Gives you professional results, fast and easy.

Unique design for trade and DIY.

PRODUCT CODE	DESCRIPTION	PRICE EACH	CARTON QTY	CARTON PRICE EA.
TAPING BOXES				
	<i>An economically priced taping tool that applies compound and paper joint tape in just one step! Adjustable control knob allows for accurate and consistent coat of compound under tape. The gears apply tape evenly to the joint, avoiding folds or wrinkles. Holds over 2Kg of compound and disassembles fast for easy loading and cleaning.</i>			
TX650	Intex Taping Tool	135.00	4	125.00

Designed to install fibreglass tape onto all joints, walls, corners and ceilings.

Applies tape in a smooth continuous motion, then cuts tape to the desired length. Most high areas can be reached from the floor.

This tool is the fastest and most efficient way to apply mesh tape.

PRODUCT CODE	DESCRIPTION	PRICE EACH	CARTON QTY	CARTON PRICE EA.

NEW CATALOGUE UNDER CONSTRUCTION

Tapetech

Mudrunner power assisted internal finisher

Simple operation

1. Compound loads through nozzle from conventional loading pumps
2. As compound is pumped into the cylinder - the internal gas cartridge is compressed
3. When variable throttle grip is twisted, the gas cartridge releases, allowing compound to flow without any effort required

Fits common brands of internal finisher heads (head sold separately)

Large capacity "see through" compound chamber holds 50% more compound than conventional internal corner boxes

Power Assisted

Quick release clamps for easy cleaning

Work Smarter – Not Harder

No Leads, No Hoses, No Effort!

- Reduce body fatigue
- Uses thicker compound, giving better coverage and little compound shrinkage
- Ideal for all 90° internal corners, square set ceilings and bulkheads
- Slim design allows "one sweep" to finish corner - no patching up required
- Applies bedding compound to corners when used with external "Mud Head" or internal compound head attachments
- Reaches up to 3.6m without stools or stilts

CORNER SMOOTHER					
		<i>This tool is to be used in conjunction with the Monster Mesh Taper. Similar to standard corner finishers that are used with paper tape, this tool is designed for finishing angles where mesh tape is applied. Corner smoother clicks into either standard corner box or the Mudrunner and distributes compound evenly in corners and smoothly feathers both sides in one pass. Spring action flexes for corners that are slightly over or under 90° and the blade design produces perfectly feathered angles without snagging the mesh tape.</i>			
	TX765	Tape Tech Mesh Tape Corner Smoother	740.00	2	POA
MUD HEAD					
		<i>Used to apply joint compound to external corners. Particularly useful for installing the NoCoat structural corner system. Clicks onto the standard corner box, Mudrunner or Compound Tube and applies a consistent wide ribbon of joint compound to each side of the corner.</i>

Tapetech Flat Finishing Box features

Wheels are on outside of trowelling area preventing running of wheel through new work. Independent pivoting axle compensates for poor framing or hanging and allows for easier, faster use.

Easy and positive crown adjustment with dial and dual push rods

Quick release twist latch for fast cleaning - no screws to lose. Stamped serial number for anti-theft and warranty identification. Precision manufactured and with one-piece wiper ensuring a leak-proof seal.

End plates are routed and tie rods hold box together securely and permanently. This stops box from twisting ensuring perfect finish forever.

	PRODUCT CODE	DESCRIPTION	PRICE EACH	CARTON QTY	CARTON PRICE EA.
		FLAT BOXES			
		<i>Automatically dispenses the correct amount of compound on flat joints. Blade adjusts to achieve proper crown. Available in 3 different widths, these tools are easy to operate and produce uniform results every time. The boxes are controlled by specially designed handles that are available in 4 different lengths or extendable. Compound is loaded into slot using either type of loading pump.</i>

ORIGINAL PRICE NOT CURRENT UNDER NEW CATALOGUE

Tapetech *Flat Finishing Box* **power assisted**
Work Smarter – Not Harder

Quick release latch for easy access to clean - no screws to lose

Safety latch holds pressure plate in filling position

Adjustable spring tension

Power Assist mechanism is actuated when wheels are in contact with board surface

Independent pivoting axle compensates for poor framing or hanging and board surface imperfections

Opens fully for fast and easy cleaning

Power Assist Springs – pressure plate is under spring tension which pushes compound out

Fits common brands of handles

Larger than conventional boxes – holds more compound

The TapeTech Power Assisted Flat Finishing Box has all the features of the standard finishing box plus the “Power Assist” spring loaded pressure plate mechanism. This takes the hard work out of running a flat box and allows for thicker compound to be used creating better coverage and less shrinkage.

No Leads, No Hoses, No Effort

- **Reduce Operator Fatigue**
- **Produce A Superior Finish**
- **Increase Profitability**
